

July 23, 2013

Ms. Petranovic,

Wolverine Fire Protection CO. has a position available and I got your email from the OMFPS website. In your position with the OMFPS Executive Board, we thought you may know of someone or be able to get the word out that Wolverine is **actively searching for a Fire Inspections Manager** for the Detroit area.

Full time salaried position – full health/vision/dental/401K benefits – company vehicle to use for inspection travel

Fire Inspector for our Full Service Inspection Department. We are looking for someone who can come in and help with our Detroit area inspection program, which had been previously run by our Flint Office. We have established clients, but want to expand that base within the 4 county Detroit area.

Would need to have experience in inspections for wet and dry FP systems. Know the applicable code. Be able to make correction recommendations for project managers to follow up with quotes. Ongoing industry training will be provided – i.e. fire extinguisher/kitchen hoods/ foam systems, etc.

Self-starter who wants to grab this program and develop it into its future. I'm sure there's much more that I left out – but please pass the word and feel free to email or give me a call.

Thanks ,
Donna
